Monitoring

Are you doing it ? and why it matters

Alan Gordon
Chief Technology Officer
Jumoo

Facts....

- CTO for the Humac group
- Responsible for IT operations
- Responsible for consultancy
- Responsible for solution development

Are you doing it ?.....

We are !!

and why it matters !

because its great fun ! ;-)
And provides great value

Definition

From Wikipedia:

To observe a situation for any changes which may occur over time

New Definition

From me:
methodical process of evaluating filtered subsets of unrelated data in a structured form withing a given timeframe

Why it matters

- Responsetime → Proact
- Knowlegde → Planning / Auditing
- Cost Management → IT Budget / Production

Transparency

- Be open about it
- Provide visibility
- move it to the end user

Result

- Develop instead of maintain !
- Because IT should spearhead your organisations
- And that takes time
