Parallels Mac Management
for Microsoft SCCM

> Parallels Mac Management for Microsoft SCCM

Today System Center is prevalent for PC management

Microsoft System Center Configuration Manager (SCCM) provides unified management & security infrastructure to Windows computers

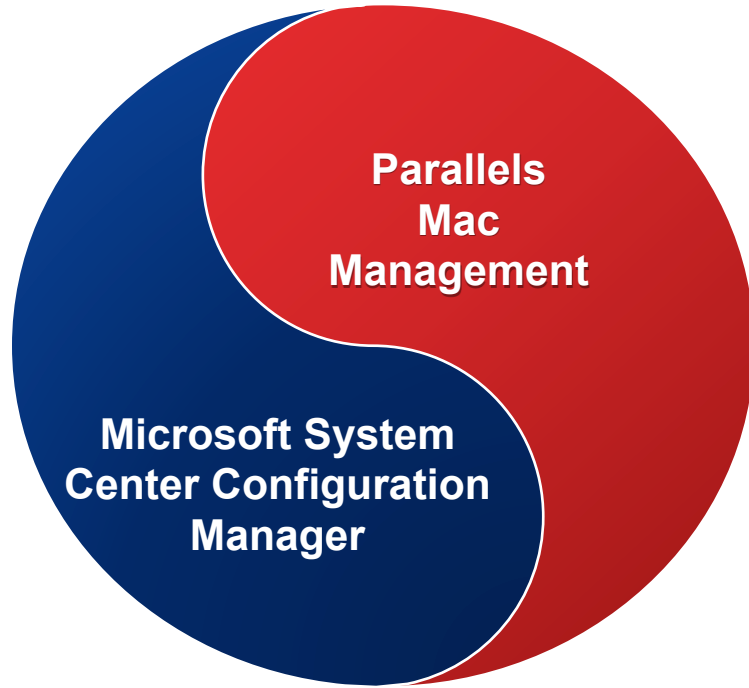

Windows
Centric

- Unified management & security infrastructure
- Simplify IT administration
- Compliance and settings management
- Software update management
- Inventory

***But the best solutions for Mac required new tools,
new processes and new skills...until now***

Unify PC and Mac Management

Now Macs get:

- Discovery
- Inventory
- Compliance
- Software deployment
- Self-service App Portal
- OS image deployment
- Reporting
