

CORTADO
MOBILE SOLUTIONS

Secure or Productive?

That is the question!

Mobile work style

CORTADO
MOBILE SOLUTIONS

Enterprise Mobility with Cortado Server

Requirements for a Future-Proof EMM Solution

Cortado Corporate Server provides the right balance

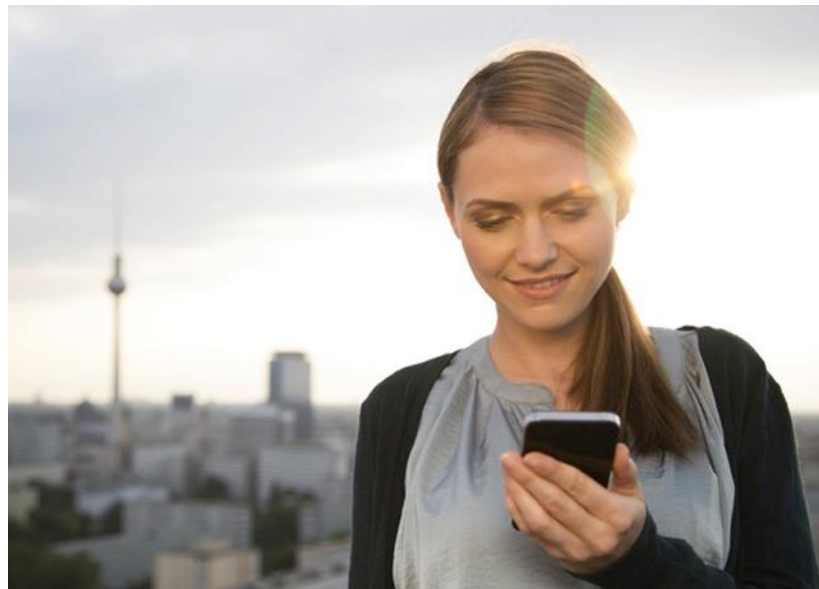

Forcing Security

Holding back Productivity

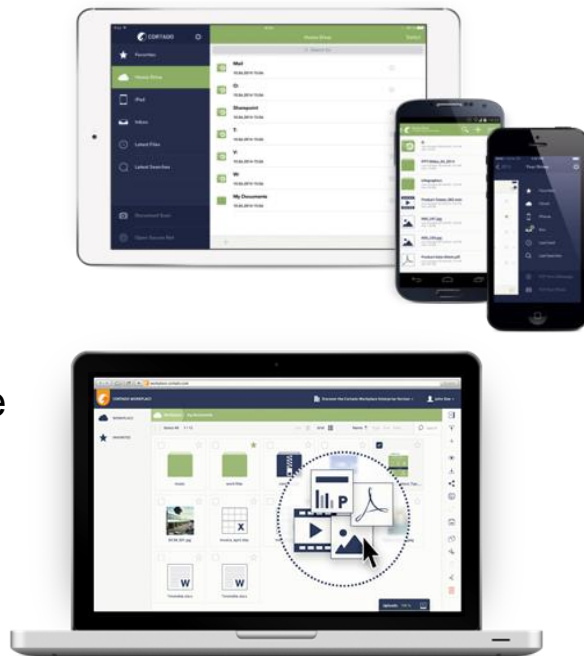

Mobile work style

Managing the New Workplace

Cortado Corporate Server

- Complete, central manageability, app-based work environment
- Native device management support for all platforms
- Support for millions of apps
- Complete file infrastructure, including printing & more
- Easy. Secure. Productive.

Avoiding Propriety Mechanisms

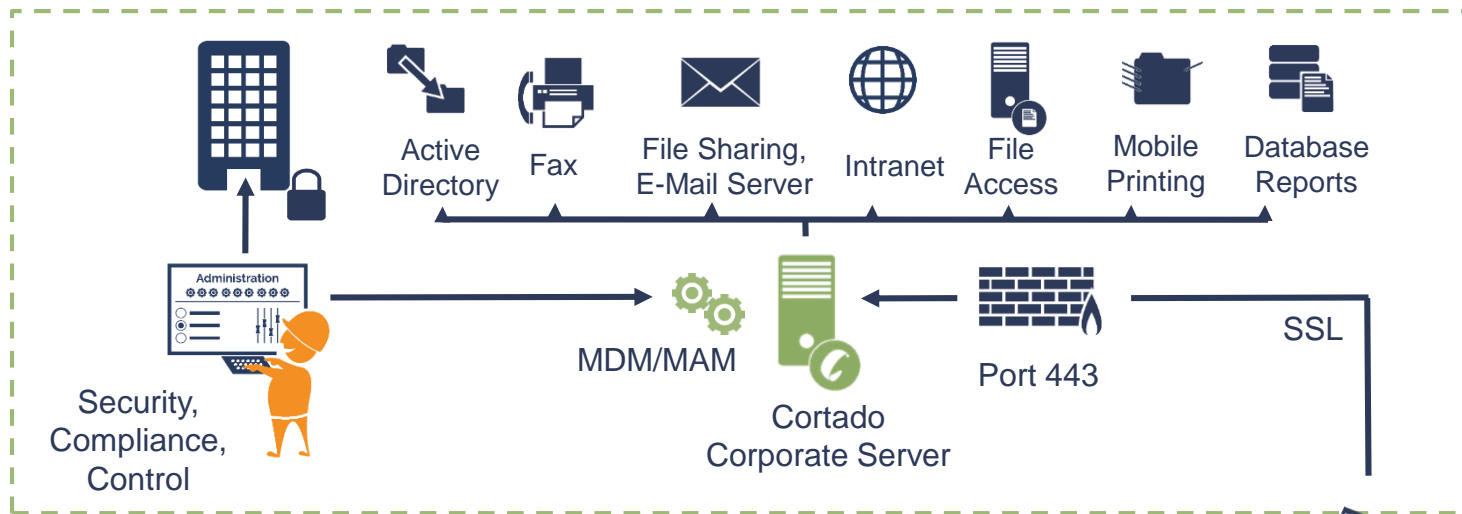

- No duplication of data and rights maintenance for mobile users
 - Integration into the existing rights management system
- Access to resources:
 - Based on the user context
 - Assume the same rights as in the corporate structure
 - Can be further restricted if required
- Use of established mechanisms and protocols
 - SSL for encryption
 - Windows server environment
 - Native data separation on devices

Satisfied employees – getting more done

Integration of Existing Resources

Let employees and admins work with the existing systems they know and trust:

► User experience and acceptance are dramatically higher!

Web App

Native Apps

Native App Management

Intuitive Cortado Management Console to build flexible app container

Deployment of in-house and third party apps via push or internal enterprise app store

Full integration with Windows-Backend, Device Management and Cortado Workplace app

Secure company data – getting more done - mobile

TURN YOUR
SMARTPHONE

File Access & File Sharing

File Access & File Sharing

If you do not offer a secure file sharing method, this is going to happen:

File Access & File Sharing – User Acceptance

What do users expect from mobility

- Direct access to file server
- Collaboration (internal/ external)
- Availability of numerous productivity options:

Viewing

Editing

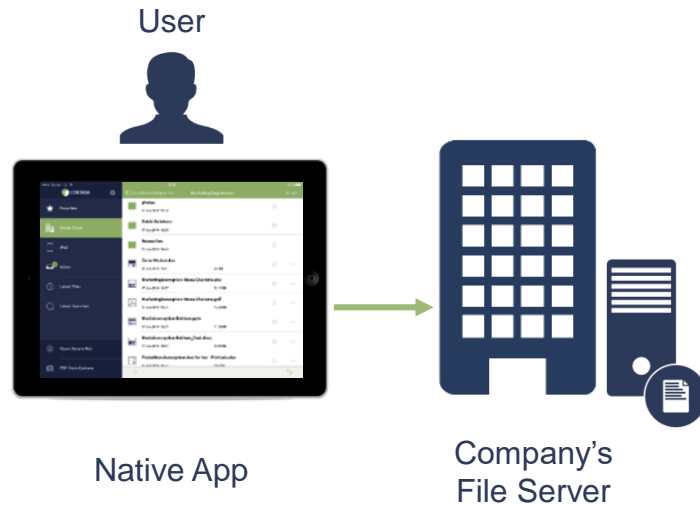

Printing

Sharing

Conversion to PDF

Scanning

& more...

► Comparable user experience
to desktop at the office

Challenges when it comes to Mobile Printing

Mobile printing is a hassle

- Limitation in the choice of printers
- Printing to network printers only from desktops
- Printers cannot be reached from outside the company
- Restrictions when using Apple, Google and other services

Does printing have to be so complicated?

Solution: Mobile Printing via Cortado

17 years of experience in printing

Flexible, mobile print options:

- ✓ Network printing
- ✓ Wi-Fi printing
- ✓ Native iOS printing
- ✓ Android Print
- ✓ Printing of websites
- ✓ Secure printing

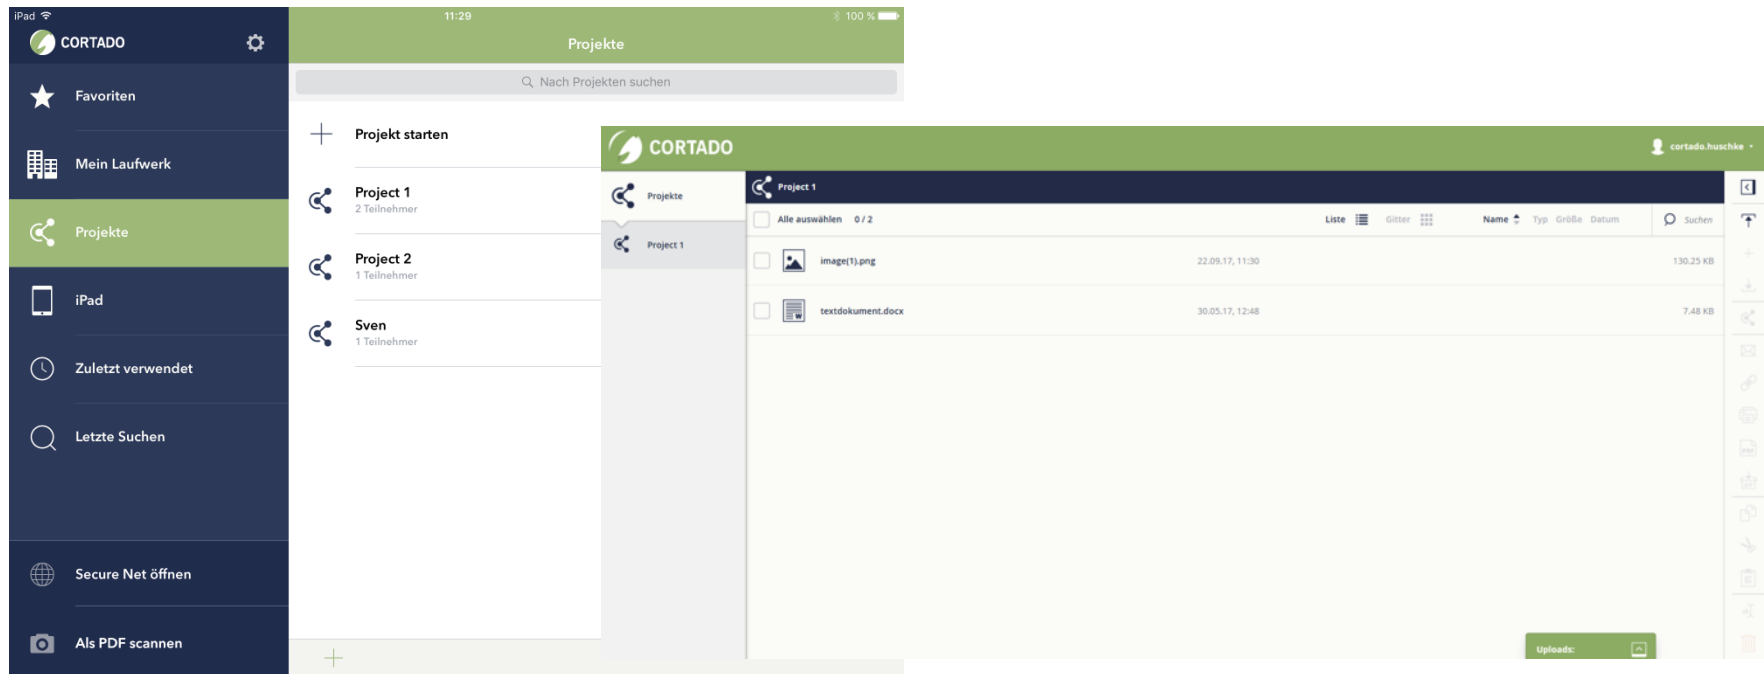

Mobile Printing

Cortado Corporate Server

- Support of all devices and OS versions
 - Native Clients for iOS and Android
 - Web app for Windows, Mac and any other device
- No additional software required
- Support of all printer manufacturers and any printer
- Native iOS printing (Android Print) with any printer possible

File Sharing – Virtual Data Rooms

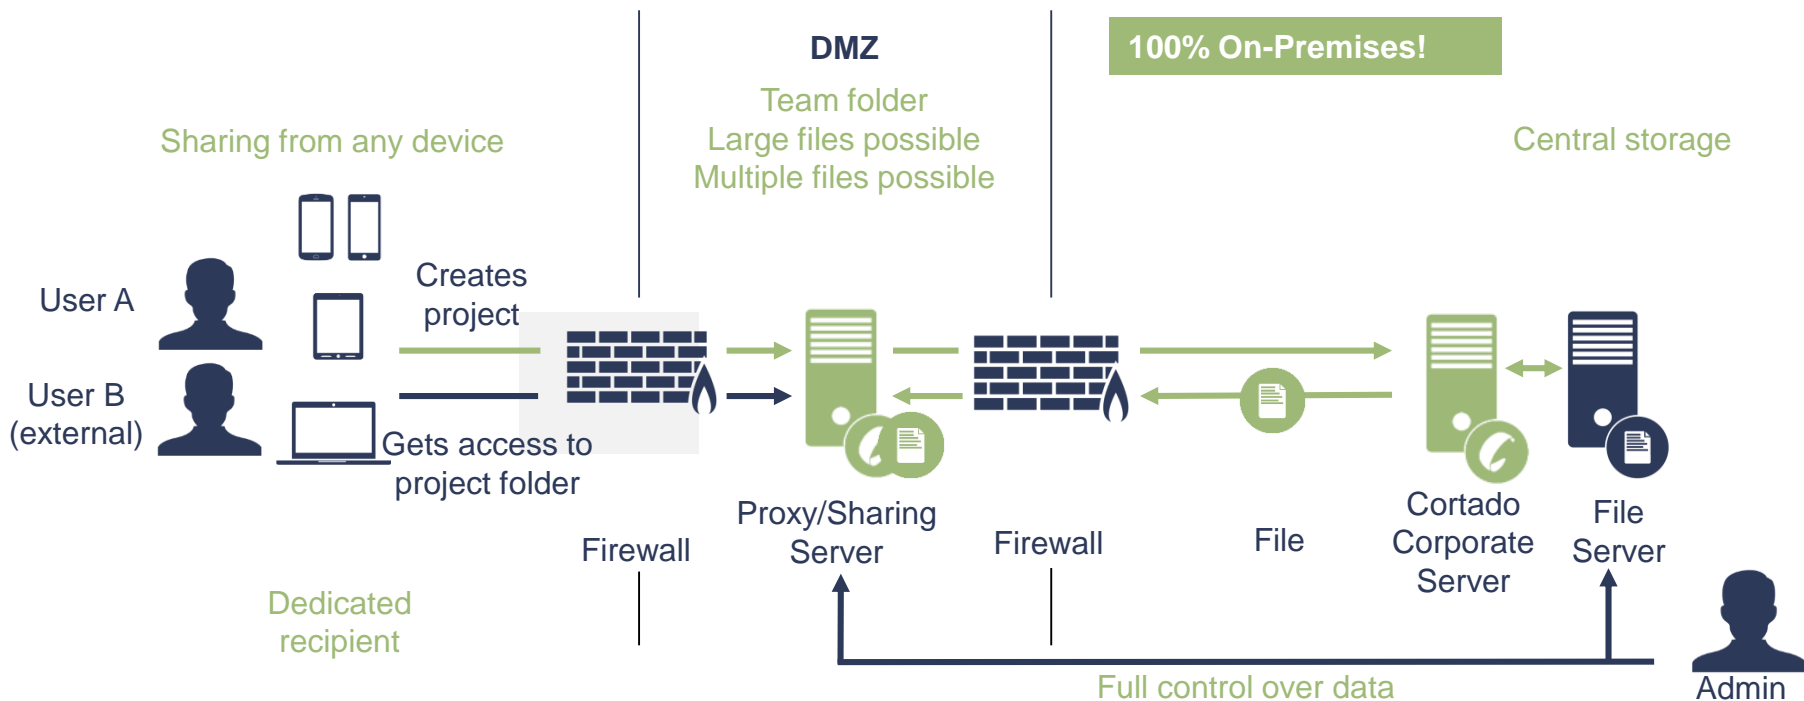

The screenshot displays the CORTADO mobile application interface on an iPad. The app is titled "CORTADO" and shows a sidebar menu with options: Favoriten, Mein Laufwerk, Projekte (highlighted), iPad, Zuletzt verwendet, Letzte Suchen, Secure Net öffnen, and Als PDF scannen. The main screen shows a list of projects: Projekt starten, Project 1 (2 Teilnehmer), Project 2 (1 Teilnehmer), and Sven (1 Teilnehmer). The detailed view of "Project 1" shows a list of files: "image(1).png" (130.25 KB) and "textdokument.docx" (7.48 KB). The interface includes a search bar, a status bar at the top, and a bottom navigation bar.

Project 1 Details:

Name	Typ	Größe	Datum
image(1).png	Image	130.25 KB	22.09.17, 11:30
textdokument.docx	Document	7.48 KB	30.05.17, 12:48

On-Premises File Sharing with Internals & Externals

Meaning for Businesses

Enterprise

- BYOD with Android finally possible
- Native app management
- Independence in app selection
- Flexible app container
- Native user experience
- Multi-platform strategy possible

Required: MDM client on device and EMM solution

Android + Cortado = Perfect Combination

- Partner of *Android at Work* program
- EMM solution with the most flexible approach
- Focus on native user experience
- Cortado Workplace as productivity app and MDM client
