# Installomator 10

swiftDialog integration  
for Self Service installations

Improved MDM scripts

# File locations

## Script

```
/usr/local/Installomator/Installomator.sh
```

```
# /usr/local/Installomator/Installomator.sh longversion
```

```
2022-09-21 18:27:33 : REQ    : longversion : ##### Start Installomator v. 10.0beta3, date 2022-09-21
```

```
2022-09-21 18:27:33 : INFO   : longversion : ##### Version: 10.0beta3
```

```
2022-09-21 18:27:33 : INFO   : longversion : ##### Date: 2022-09-21
```

```
2022-09-21 18:27:33 : INFO   : longversion : ##### longversion
```

```
2022-09-21 18:27:33 : REQ    : longversion : Installomater: version 10.0beta3 (2022-09-21)
```

```
% /usr/local/Installomator/Installomator.sh version
```

```
10.0beta3
```

## Log

```

```

```
# tail -f /private/var/log/Installomator.log
```

# New MDM scripts

enrollment  
App-install  
w. adding to Dock

# How to begin?

We need locally installed software:

Installomator

swiftDialog

dockutil

There are scripts for that:

Run them regularly

---

# Enrollment scripts

Installomator 1st DEPNotify

Installomator 1st

Progress 1st swiftDialog

# App installation

Browser/security

Normal

Service

ValuesFromArguments

Either ...

Auto-install, or

Self Service

---

# Implementation

Addigy, Mosyle, Microsoft and maybe others
